Summary

Software Engineering undergraduate (ECE, 2028) with hands-on experience building full-stack and backend applications using React, Node.js, Python and SQL/NoSQL databases. Experienced in REST API development, backend performance optimization, database transactions and automated testing. Strong foundation in DSA with 1000+ problems solved, complemented by hackathon experience and practical software development.

Education

Indian Institute of Information Technology, Design and Manufacturing Jabalpur — Jabalpur, MP
B.Tech in Electronics and Communication Engineering — *2024 – 2028*

Skills

Languages: C++, Python, JavaScript, TypeScript, SQL
Frontend: React, Next.js, HTML, CSS, Tailwind CSS, DOM, AJAX
Backend & APIs: Node.js, Express.js, FastAPI, REST APIs, HTTP, Web Services (Basics)
Databases: MongoDB, MySQL, Redis, SQLite
ML & Data: Scikit-learn, Pandas, NumPy
Tools & Security: Git, GitHub, Pytest, Pydantic, Gemini API, JWT, RBAC
Core CS: OOP, Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks

Project Experience

Zenith | *React, Node.js, Express.js, MongoDB* | GitHub | Live — May 2026 – Present
- Delivered a full-stack trading platform with portfolio, watchlist and buy/sell flows (**15+** REST endpoints).
- Prevented race conditions in atomic order execution via MongoDB transactions, optimistic locking and 3 retries.
- Created 5 aggregation pipelines for portfolio analytics; secured it with bcrypt, RBAC and CORS rules.

Ascent | *React, Node.js, Express.js, MongoDB, Redis* | GitHub | Live | CF Blog — Sep 2026 – Present
- Launched a React-based Codeforces comparison platform aligning two users' journeys on relative-day timelines.
- Reduced API latency from **850ms to 5ms (99.4%)** via Redis caching on 8+ endpoints with fallback.
- Introduced struggle detection and milestone prediction over 500+ data points per user to flag rating plateaus.

Wheatcoin (KisanMandi) | *React, Node.js, Express.js, MongoDB, FastAPI, Scikit-learn* | GitHub — 2026
- Built an agri-fintech platform: a Node.js/Express server plus a FastAPI ML service giving HOLD or SELL advice.
- Retrained a Random Forest on 3,500 real Agmarknet samples, lifting accuracy from roughly 94.2% to **96%**.
- Added a Gemini-powered copilot and a dashboard showing cross-validation and confusion-matrix metrics.

Hackathons

TVS Credit E.P.I.C. 8.0 – Semi-Finalist | *CredIntel: Python, FastAPI, React, SQLite* | GitHub — Sep 2026
- Advanced to semi-finals among **60,000+** participants with a prototype assessing credit without bureau scores.
- Modeled a 5-pillar scoring framework (0–100) with per-factor attribution, separated from review policy gates.
- Persisted decisions in SQLite for auditing; validated on synthetic data with **15** automated Pytest tests.

Achievements

- Solved **1000+** DSA problems on LeetCode, Codeforces, GeeksforGeeks and Code360.
- Achieved the **Knight badge** (top 4% globally; peak rating 1925) on LeetCode.
- Reached a rating of 1368 on Codeforces.
- Ranked 19 of 150+ teams (top 13%) at Code Rumble, an inter-college ICPC-style programming contest.
- Finished as **Runner-Up** (2nd of 90+ teams) at the Can You Hack It hackathon, IIITDM Jabalpur.

Leadership & Volunteering

Coordinator, Badminton Club | *IIITDM Jabalpur* — 2025 – Present
- Led planning and execution of college tournaments involving 300+ participants, managing registrations, fixture planning and scheduling.

Volunteer, HackByte 2024 | *IIITDM Jabalpur* — Apr 2024
- Supported participant coordination and event operations for 150+ teams, contributing to smooth event execution and team coordination.
